

SkyNest Travel Co. — UI/UX Website Redesign

This project was created as part of the UI/UX Design Internship at Future Interns. The goal of this project was to design a modern, visually appealing, and conversion-focused travel agency website that encourages users to explore travel packages and complete bookings easily.

Project Goal

Create a user-friendly travel website with strong visual storytelling, clear call-to-actions, responsive layouts, and a professional brand identity.

Problem Statement

Many travel websites feel cluttered and difficult to navigate. This redesign focuses on simplicity, emotional visuals, clean layouts, and better user engagement.

Target Audience

- Young Travelers
 - Families
 - Adventure Seekers
 - International Tourists
-

User Goals

- Explore destinations easily
 - Compare travel packages
 - Book trips quickly
 - Access trustworthy travel information
-

Design Features

- Hero section with CTA button
 - Service showcase section
 - Travel package promotions
 - Testimonials section
 - Footer with contact information
-

Wireframes

Wireframes were created to plan the website layout structure, content hierarchy, and CTA placement before final UI development.

User Flow

Landing Page → Explore Packages → Destination Details → Book Now → Contact Form → Confirmation

Design Decisions

Gold tones were used to represent luxury travel experiences. Large imagery was used to create emotional engagement. Multiple CTA buttons were placed strategically for better conversion optimization.

Conclusion

This project helped improve understanding of UI/UX principles, visual hierarchy, conversion-focused design, responsive layouts, and branding strategy.

Project Deliverables

Deliverables	Status
Desktop UI Design	Completed
Wireframes	Completed
User Flow Diagram	Completed
Mobile UI	Completed
Case Study PDF	Completed
